

## Need-Satisfying Environment

Record all the ways you currently use to assist students in meeting their five basic needs. And then, record additional things you plan to implement as a result of reading this lesson. Please do not limit this to your own ideas and creativity. Discuss with colleagues to see how many new ideas you can generate. When you list something you plan to implement, also record an implementation date so it doesn't just become something you will when it's convenient. It may never be convenient. Record when you will do it and stick to it.

### **Survival:**

Current do:

Will implement by when:

### **Love & Belonging:**
